4.3.1 Institution frequently updates its IT facilities and provides sufficient bandwidth for internet connection

Response:

After the second cycle of NAAC in our institution, there has been paradigm shift in the technology and teaching aids. i.e., black boards to green boards. The college has updated its IT infrastructure to cater the needs of the students ensuring effective and outcome-based teaching - learning. The feedback is taken periodically from the system administrator, quality of service and requirements so as to meet the future needs. Also our parent institute has provided an LMS software and Zoom Meeting to take the online classes during Covid -19. The college has been consistently making efforts to improve IT infrastructure and facilities as per suggestions and recommendations made by the staff.

Our Institute campus is Wi-Fi connected with the land line of speed 100 mbps. Two plans are run i.e., BSNL and Optical fibre. Biometric attendance machine is available. The laboratories have upgraded with the latest hardware and software along with printing, photocopying and scanning facilities. Also, latest B/W and coloured printers and Xerox machine are available for fast printing of the documents with quality.

The college central library is partially automated and supported with the latest version of E- Granthalay. The college library has separate enclosure for students/Scholars to work on the computer for accessing the e-resources. The administrative section has been provided by improved hardware and software supports to keep the connectivity seamless. Also, along with this we provide OPAC facility for the students. Also internet facilities service from the library.

The college has version of Pentium 4 computers for the Labs and office use also. Institutions frequently updated the computer system, there are 4 computer laboratories. All are equipped with sufficient number of computers with latest configuration. There are total 93 computers out of which 74 are used for educational purpose and the remaining 12 are used in office and various departments.

The monitors of computers are LED/LCD that are compact, eco-friendly and generate less radiation. Mostly they are kept in library browsing Centre, Commerce Computer lab, Home Science Computer lab and English Language Lab.

Our Institute campus is also covered with CCTV cameras and monitoring is done in the principal's cabin.

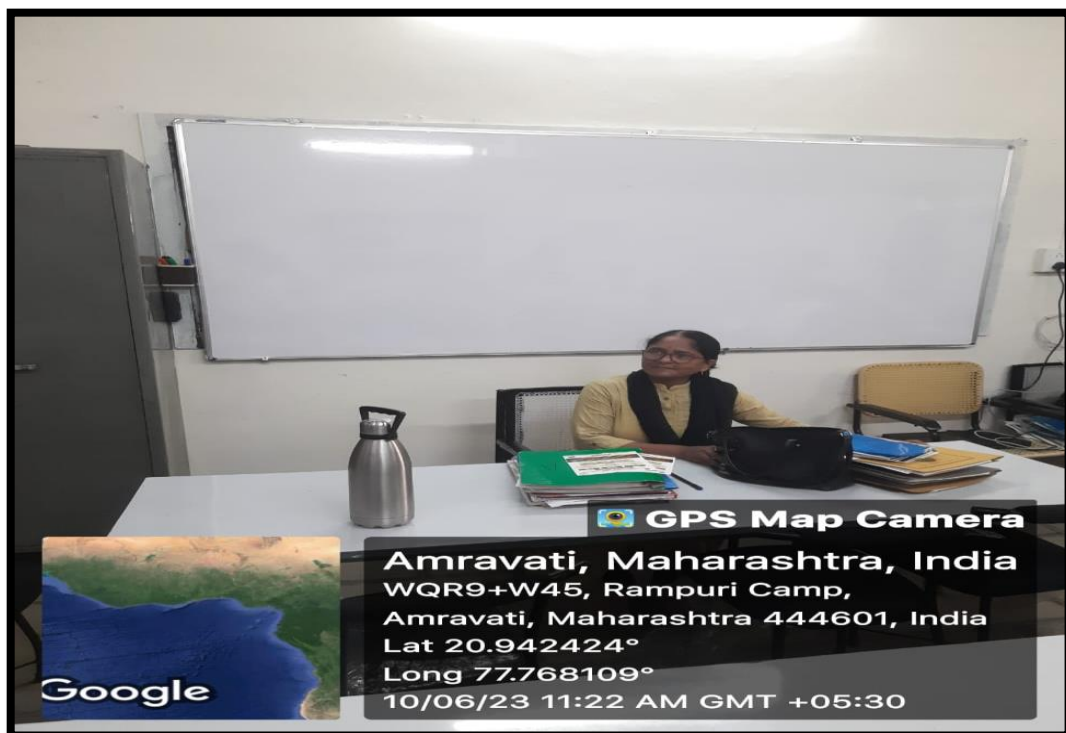

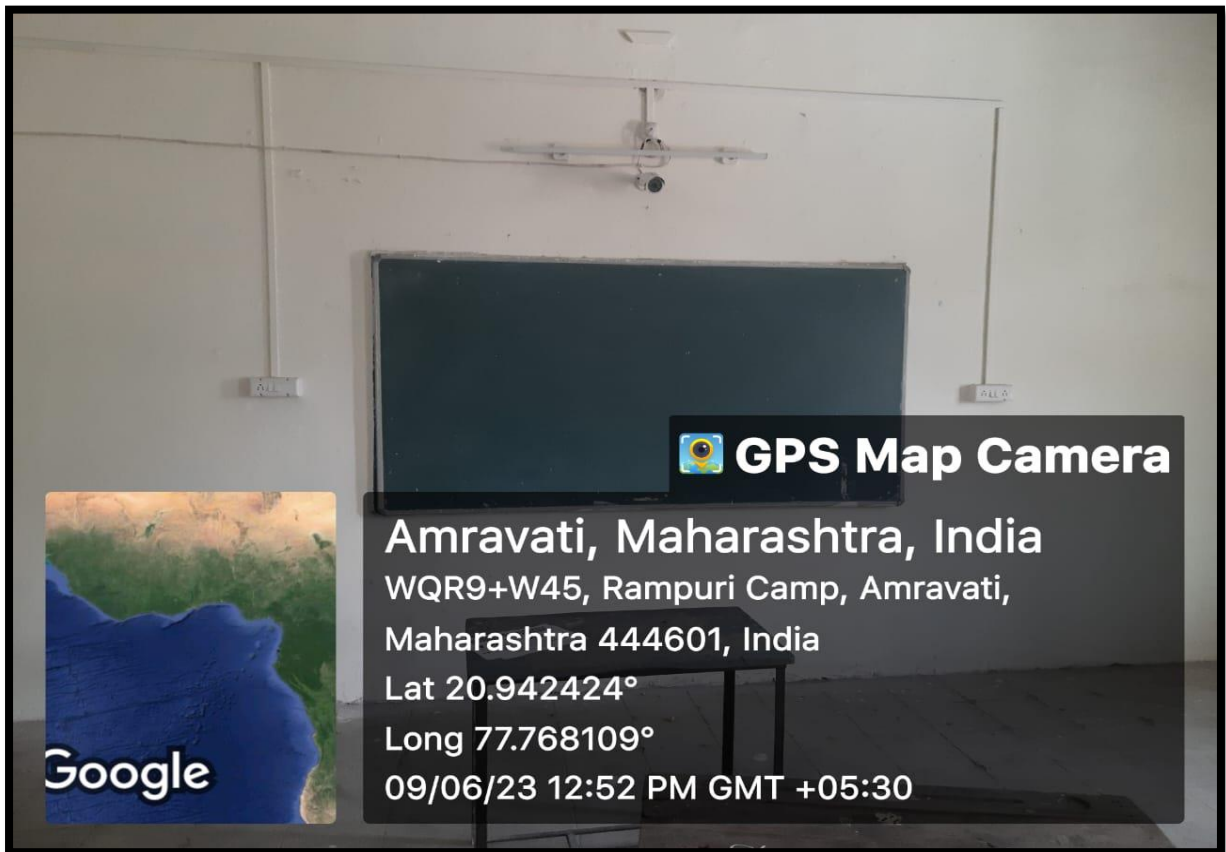

Office is automated and every effort is being made to digitalize the administrative process. The office is installed with customer software i.e., ERP software for digitalization of every segment of the administration. At present the college has upgraded with UPS generator backup facility.

CRITERION – IV INFRASTRUCTURE AND LEARNING RESOURCES

Also, LCD projector is fitted in the language laboratories and AV theatre, Auditorium and 04 ICT Class rooms and 01 is kept movable whenever necessary. Interactive LCD Screen is fixed in AV theatre.

Our college ensures regular updating of institutional website [www.http://mvdcollege.org/](http://mvdcollege.org/) with news, notices, faculty information, admission process and facilities available in our campus.
